BASELINE
EF SET B1 · 41/100

TARGET DATE
December 2026

DAILY TIME
1 hour / day

PROGRESS TEST
EF SET only

🔒 FOCUS-LOCKED · Cambridge English removed · EF SET is the only progress-check test · Trimmed to essentials only · Stick to this list only

Trimmed for you — removed as not worth your limited time:

- **VOA Learning English** — same function as BBC 6-Minute (native + slower version), redundant
- **Living Abroad listening series** — generic B2 scenarios, no unique value over BBC/TED/Darknet Diaries
- **Vocabulary.com** — vocabulary is already de-prioritized (Section 5); Espresso English + Anki cover this better
- **My English Classes Online** — grammar content overlaps with English with Lucy + English with Greg
- **HelloTalk/Tandem** — social conversation-partner app; not something you've shown interest in using, and self-talk + shadowing + ELSA already cover active production
- **Section 5.1 "Later/Optional" bucket** — Elephant English, English with Axel, Camille — genuinely optional, dropped until a specific gap appears

0 Why This Redesign — The Real Problem

Your EF SET breakdown (Reading 35, Listening 38) and your BBC 6-Minute quiz behaviour proved the actual gap: **content comprehension is already strong** (6/6 correct on meaning-based questions), but performance drops specifically on **tense identification and parts-of-speech questions**. In Hindi you speak with zero conscious tense-tracking — that's **acquired/automatic** language. In English, you're still running a "**translate → apply rule → produce**" pipeline, which is slow and breaks under real-time pressure (speaking, writing, timed quizzes).

This redesign: (1) puts **Tense + Parts-of-Speech automaticity drills first**, not after vocabulary, (2) adds daily **active-production practice** since your passive vocabulary is already large, (3) keeps only the resources that genuinely earn their place for your goal — redundant/low-value ones (VOA, Living Abroad, Vocabulary.com, My English Classes Online, HelloTalk, the Later/Optional bucket) are removed, with **Phase 1 (Vocabulary Building) also marked complete and removed**, (4) targets **December 2026 at 1 hr/day**, and drops Cambridge English — EF SET only.

Honest note: this plan is built directly around your diagnosed root cause and covers all 4 skills (listening, reading, writing, speaking) with targeted drills for each. It gives you the best realistic path to B2 — but no roadmap can "guarantee" it alone. The result depends on daily consistency + the self-correction loop (Section 6). Skipping days or skipping self-talk will slow it down, whatever the plan says.

1 The 5-Skill Framework (Updated)

Skill	What It Means For You	Where It's Practiced
Grammar Automaticity NEW	Tense + parts-of-speech recognition/production without conscious translation	Section 2
Expression	Building sentences on the spot without translating from Hindi	Sections 3, 4
Comprehension	Understanding native-speed speech first-time, no rewinding	Section 4
Self-correction	Noticing and fixing your own grammar/word errors live	Section 6
Fluency + Confidence	Natural pace, no long pauses, no hesitation	Sections 3, 8

2 Grammar Automaticity — Tense & Parts of Speech (Root-Cause Fix)

This section comes **first**, ahead of vocabulary, because it is your diagnosed bottleneck.

Tag	Resource / Drill	Why It's Here	Access
NEW	Daily Tense-Mapping Drill	5 sentences/day — identify the tense of every verb out loud	<i>Self-practice, no link needed</i>
NEW	Parts-of-Speech Tagging	Same 5 sentences — label Noun/Verb/Adjective/Adverb/Preposition	<i>Self-practice, no link needed</i>
BOTH	Learn ALL Tenses: Complete Course <i>English with Lucy</i>	Full tense course, 20-min daily chunks (from your Playlist Plan)	Open Channel →
BOTH	Essential B2 Grammar Lessons <i>English with Greg</i>	62 short videos, direct B2 grammar + tense-contrast drills	Open Channel →
BOTH	Perfect English Grammar	Free exercises on spoken sentence patterns — real-time construction	Open Site →

3 Active Production — Turning Passive Vocabulary Into Speech

You already know a large passive vocabulary. The gap is retrieval, not storage. These drills force production, not recognition.

Tag	Resource / Drill	Why It's Here	Access
-----	------------------	---------------	--------

BOTH	Self-talk / narrate-your-day	Describe what you're doing out loud in English, 10 min/day	<i>Just practice, no link needed</i>
NEW	Chunk Learning (phrase-based)	Fixed phrases, not single words — locks in correct word-order	<i>Build from your own corrections</i>
BOTH	Shadowing	Play 1 sentence → pause → repeat matching speed/rhythm → replay to check	<i>Uses Section 4 resources</i>
BOTH	ELSA Speak (free tier)	AI pronunciation feedback — tells you exactly which sounds are wrong	Open Site →

4

Listening — Native-Speed Comprehension

Tag	Resource	Why It's Here	Access
BOTH	BBC 6 Minute English	Perfect B1-B2 level, free transcript + vocab notes every episode	Open Site →
DAILY LIFE	Darknet Diaries podcast	Already in your routine — native, unscripted, natural-speed storytelling	Open Site →
OFFICE	TED Talks (with subtitles)	Professional-register native speech, subtitle toggle for self-check	Open Site →

5

Vocabulary — Consolidation Only (De-prioritized)

Vocabulary is now **secondary** — your passive vocabulary is already large. Use these only for genuine gaps.

✔ **Playlist Plan Phase 1 (Vocabulary Building) — completed.** Upper-Intermediate B2 Vocabulary, Upper-Intermediate B2 Phrases (Interactive English), and 600 English Words for Everyday Life (English with Lucy) are done and removed from the active list below.

📅 **FINAL CHECKPOINT — Mid-December 2026**

Final EF SET test · Target: 51+ (solid B2) · Compare full journey: 41 (Sep) → retest (Oct) → retest (Nov) → final (Dec)

10 Final Focus Rules — Locked

- This is the complete resource list for your B2 goal — do not add new apps/channels/courses beyond this document.
 - B2 is the target. Not C1, not C2 — those solve problems you don't have.
 - Grammar automaticity (tense + parts of speech) comes first** — it is your diagnosed root cause, not vocabulary.
 - Self-talk and shadowing are your highest-leverage daily practices — never skip them.
 - Only add a word/chunk to Anki if you personally made a mistake with it — no generic memorizing.
 - Office English (Section 7) starts in full only after daily-life fluency feels stable.
 - EF SET only** — test at baseline (done), end of Oct, end of Nov, and mid-Dec.
 - 1 hour/day, every day, beats a long weekend session — same principle as your SOC roadmap.
 - One video (or one chunk) per day in the core phases — no binge-watching multiple videos in one sitting.
 - Cybersecurity/tech videos (Wireshark, Git, Java, etc.) stay in the separate SOC study slot — don't mix them into this English time.
 - After every practice session, ask Claude for a sharpness rating, progress update, and revised timeline.
