

ENGLISH B2

FLUENCY RESOURCE ROADMAP

Candidate	Shivam Kumar
Current Level	~B1+ (self-assessed higher, realistic estimate B1+)
Target Level	B2 — confident, natural daily-life + office speaker
Scope	Daily life (grocery, travel, friends, family) + Office/professional English
Explicitly Out of Scope	C1/C2 academic English, crowd networking, small-talk-for-its-own-sake
Timeline	5 months, 1 hour/day, starting July 2026
Document Status	Focus-Locked — no new resources added beyond this list

🔒 FOCUS LOCK — STICK TO THIS LIST ONLY

Legend: Every resource is tagged **DAILY LIFE** **OFFICE** or **BOTH** so you know exactly when to use it. This document is deliberately short — B2 for daily-life + office use does not need more than what's here.

Table of Contents

- 0. Why This List Is Enough — The Philosophy
- 1. The 4-Skill Framework
- 2. Listening — Native-Speed Comprehension
- 3. Speaking & Fluency Practice
- 4. Grammar & Sentence Construction
- 5. Vocabulary — Daily Life + Office
- 6. Self-Correction & Feedback Tools
- 7. Office / Professional English Specific
- 8. Free CEFR B2 Progress-Check Tests
- 9. Weekly Practice Structure (5-Month Plan)
- 10. Final Focus Rules — Locked

0. Why This List Is Enough — The Philosophy

B2 for your goal (daily life + office/SOC-professional English) means four things only:

- Expression** — say what you're thinking directly in English, without mentally translating from Hindi first
- Comprehension** — understand a native speaker at natural speed, whatever their accent
- Self-correction** — catch your own mistakes in real time and fix them mid-sentence
- Fluency + confidence** — speak without long pauses, at a natural pace, without hesitating

You do **not** need C1/C2 academic vocabulary, literature-level idioms, or debate-level argumentation — none of that shows up in grocery shopping, travel, talking to a partner or best friend, or office conversations. You also do **not** need to seek out crowds or small-talk-for-its-own-sake. Whatever minimal small talk daily life naturally requires (shopkeeper, office lift, colleague) is automatically covered once your 4 skills above are solid — it needs no separate practice.

1. The 4-Skill Framework

Skill	What It Means For You	Where It's Practiced Below
Expression	Building sentences on the spot without translating	Sections 3, 4, 5
Comprehension	Understanding native speed speech first-time, no rewinding	Section 2
Self-correction	Noticing and fixing your own grammar/word errors live	Section 6
Fluency + Confidence	Natural pace, no long pauses, no hesitation	Sections 3, 9

2. Listening — Native-Speed Comprehension

Tag	Resource	Why It's On This List	Where To Access
BOTH	BBC 6 Minute English	Perfect B1-B2 level, real topics, free transcript + vocab notes every episode	bbc.co.uk/learningenglish
DAILY LIFE	Darknet Diaries podcast	Already in your routine — native, unscripted, natural speed storytelling	darknetdiaries.com
BOTH	VOA Learning English	Native speed + a slower "Learning English" version side by side, free transcripts	learningenglish.voanews.com
OFFICE	TED Talks (with subtitles)	Professional-register native speech, huge free library, subtitle toggle for self-check	ted.com/talks

Shadowing technique (free, needs no app): play 1 sentence from any resource above → pause → repeat it out loud matching their speed and rhythm exactly → replay to check. This single technique trains listening + speaking + accent together.

3. Speaking & Fluency Practice

Tag	Resource	Why It's On This List	Where To Access
BOTH	Self-talk / narrate-your-day (no app needed)	Describe what you're doing out loud in English for 5 min/day — builds real-time sentence construction, the exact gap you named	No link needed — just practice

BOTH	ELSA Speak (free tier)	AI pronunciation feedback, tells you exactly which sounds you're getting wrong	elsaspeak.com
BOTH	Shadowing (see Section 2 callout)	Builds fluency + natural rhythm together with listening	—
DAILY LIFE (optional)	HelloTalk / Tandem (free tier)	1-on-1 goal-directed conversation practice with natives — not crowd socializing, purely functional speaking reps	hellotalk.com

4. Grammar & Sentence Construction

Tag	Resource	Why It's On This List	Where To Access
BOTH	BBC Learning English — Grammar section	Short, practical grammar points explained through real conversation examples, not academic rules	bbc.co.uk/learningenglish
BOTH	Perfect English Grammar	Free exercises focused on spoken sentence patterns (the exact "building sentences on the spot" gap)	perfect-english-grammar.com
OFFICE	engVid — Business/Grammar lessons	Free video lessons from multiple native teachers, mixes grammar with professional context	engvid.com

5. Vocabulary — Daily Life + Office

Tag	Resource	Why It's On This List	Where To Access
BOTH	Vocabulary.com — B2 word lists	Free, spaced-repetition style, tracks what you've actually learned	vocabulary.com
DAILY LIFE	Espresso English — Phrasal Verbs & Idioms lists	Free lists of the phrasal verbs natives actually use daily, not obscure ones	espressoenglish.net
BOTH	Anki (free flashcard app)	Build your own two decks — Daily Life words + Office words — from words you personally get wrong	apps.ankiweb.net

Rule: only add a word to Anki if **you personally made a mistake with it** (wrong word, wrong tense, wrong preposition) — don't add random word lists. This keeps vocabulary tied to your real gaps, not generic memorization.

6. Self-Correction & Feedback Tools

Tag	Resource	Why It's On This List	Where To Access
BOTH	Grammarly (free tier, browser extension)	Real-time correction while you write — trains your eye to spot your own recurring mistakes	grammarly.com
BOTH	ELSA Speak (see Section 3)	Same tool, doubles as pronunciation self-correction	elsaspeak.com
BOTH	Record yourself weekly + review	Say a 1-minute story out loud, record on your phone, listen back after a day and note 3 mistakes	No link needed — built into your existing Claude practice ritual

7. Office / Professional English Specific

Tag	Resource	Why It's On This List	Where To Access
OFFICE	Business English Pod (free episodes)	Real office scenarios — meetings, emails, small talk with colleagues, phone calls	businessenglishpod.com
OFFICE	engVid — Business English playlist	Free videos on emails, interviews, presentations from native teachers	engvid.com
OFFICE	Your own SOC interview STAR-format practice	Already in your SOC roadmap (Section 5E) — this is your highest-value office English practice since it's your actual job need	See SOC_L1_Master_Roadmap_v2.1.pdf

8. Free CEFR B2 Progress-Check Tests

Resource	What It Gives You	Where To Access
EF SET	Free 50-minute CEFR-aligned test, gives you an actual A1–C2 level score	efset.org
Cambridge English — Free Practice Tests	Official-style B2 First practice materials, free	cambridgeenglish.org

Take EF SET now as your real baseline (not self-assessment), then again at 2.5 months and at 5 months. This replaces guessing your level with an actual number.

9. Weekly Practice Structure (5-Month Plan)

Day	Focus (fits your existing 1 hr/day slot)
Mon	Shadowing (Section 2) — 20 min · Grammar point (Section 4) — 15 min · Self-talk (Section 3) — 10 min · Anki review — 15 min
Tue	BBC 6 Minute English episode + vocab notes — 20 min · ELSA Speak — 15 min · Self-talk — 10 min · Anki — 15 min
Wed	Business English Pod episode — 20 min · Grammarly review of something you wrote this week — 15 min · Self-talk — 10 min · Anki — 15 min
Thu	Shadowing — 20 min · Perfect English Grammar exercise — 15 min · Self-talk — 10 min · Anki — 15 min
Fri	TED Talk or VOA episode — 20 min · engVid lesson — 15 min · Self-talk — 10 min · Anki — 15 min
Sat	Record yourself (Section 6) — 15 min · Review + note 3 mistakes — 15 min · HelloTalk conversation (optional) — 20 min · Anki — 10 min
Sun	Light review of the week's Anki cards · Rest from new input — consolidation day

⚠ CAUTION — MILESTONE CHECKPOINTS

- **Month 1:** Take EF SET baseline test · Start Sections 2, 3, 4 · Build first Anki decks
 - **Month 2-3:** Add Section 7 (Office English) once daily-life sentence construction feels stable · Re-take EF SET at Month 2.5
 - **Month 4-5:** Increase self-talk to real topics (mock SOC interview stories) · Weekly recorded review becomes primary feedback loop · Final EF SET at Month 5
- Don't skip ahead to Office English (Section 7) before daily-life fluency (Sections 2-4) feels natural — office vocabulary sitting on a shaky grammar foundation won't stick.

10. Final Focus Rules — Locked

- 1 This is the complete resource list for your B2 goal — do not add new apps/channels/courses beyond this document.
- 2 B2 is the target. Not C1, not C2 — those solve problems you don't have.
- 3 No crowd socializing, no small-talk-for-its-own-sake practice — daily life covers this automatically once the 4 skills are solid.
- 4 Self-talk (Section 3) is free and is your single highest-leverage practice for real-time sentence construction — never skip it.
- 5 Only add a word to Anki if you personally made a mistake with it — no generic word-list memorization.
- 6 Office English (Section 7) starts only after daily-life fluency feels stable — sequence matters.
- 7 Take the EF SET test at Month 1, 2.5, and 5 — track your real CEFR number, not a feeling.
- 8 1 hour/day, every day, beats a long weekend session — same principle as your SOC roadmap.
- 9 After every practice session, ask Claude for a sharpness rating, progress update, and revised timeline — this habit is already working, keep it.
